

DualGlo
TECHNOLOGY

GloTorch

The smart little torch with a big talent!

THE TECHNOLOGY

DualGlo's patented technology is a British invention which produces a strong glow in the dark with bright day colours. Our technology acts like a powerful light sponge that constantly absorbs light energy, and releases it as soon as it is dark.

10 x GLOW

DualGlo's NEW Super Glow Technology is up to 5 x brighter and lasts up to 10 x longer than other regular glow-in-the-dark products.

Because GloTorch glows-in-the-dark all night, it is always easy to find when you most need it.
